

QUESTIONS AND ANSWERS (Q&A)

Planned organizational changes: Creation of “Foundational Technologies”

Units in scope:

- Technology (T)
- Foundational Services (DI CTO FDS)
- Advanta Development (ADV D, ADV IT D, ADV CYS)
- Design Unit of DI (DI CTO DES)
- Product Carbon Footprint SiGreen (DI FA MF PCF)

Rationale for Change and Organization - Setup/Structure

What is planned to change?

We plan to merge the above-mentioned units in scope into Siemens Technology (T) through lift and drop. Technology will be renamed to Foundational Technologies (FT), which will provide the foundations for all developers, particularly for working on Siemens Xcelerator. Furthermore, we want to include SiGreen in FT.

How will one Foundational Technologies unit help us to unleash our full potential?

The goal is to reuse technology across all businesses and business units to increase speed and provide a consistent delivery and approach.

When are the new organizational plans scheduled to take effect?

The organizational structures are planned to take effect on October 1, 2024.

Will there be a change in operating model, and what will this mean?

No, the operating model will stay as it is.

What is the current planning status? How is the planning being organized?

We shared the plan with the employee representatives and will further involve them on our way to implementation.

Impact on People, Roles, and Responsibilities

How will responsibilities be arranged in the meantime? What is expected of people during the transformation process?

Current responsibilities will remain unchanged.

Do I have to change my work location?

There is no change in location due to this planned organizational change.

When will we receive further information?

We are committed to transparent communication on the progress of planning Foundational Technologies and will share updates when we are able to. We intend to invite you for an all-hands meeting on October 1, 2024.

Impact on Customers

What does this mean for our interactions with customers? Do we need to explain the new setup to them?

Our interaction model with our customers is not changing and therefore our customers do not need to be proactively informed now.
